

CLOUDBOLT EXECUTIVE SUMMARY

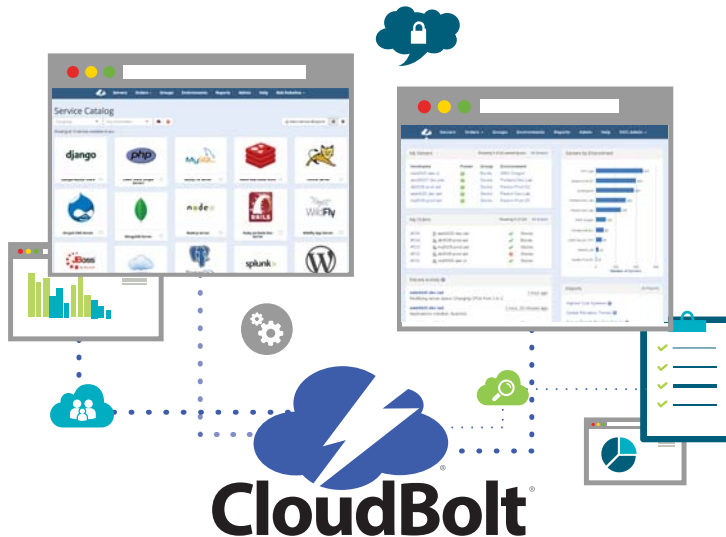

CLOUDBOLT ENABLES ENTERPRISE IT TO OPERATE AS A CLOUD SERVICE PROVIDER. OUR SIMPLY POWERFUL CLOUD MANAGEMENT PLATFORM INTEGRATES ON-PREMISES RESOURCES WITH PUBLIC CLOUDS, AUTOMATION SCRIPTING TOOLS, AND DOMAIN-SPECIFIC TECHNOLOGIES. BY DELIVERING A RESPONSIVE AND AGILE ALTERNATIVE TO SHADOW IT, CLOUDBOLT GIVES USERS WHAT THEY WANT, WHEN THEY WANT IT.

WHAT IS CLOUDBOLT?

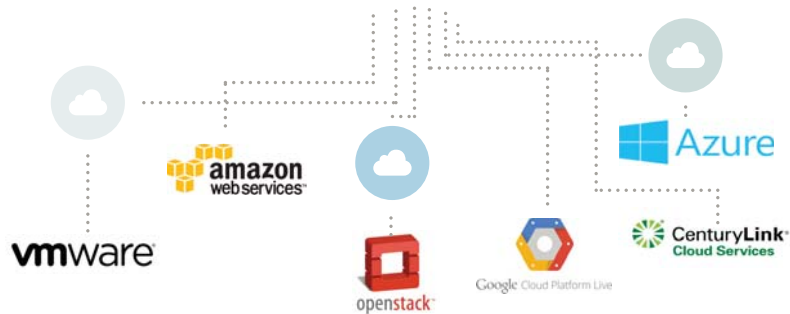

CloudBolt is a management platform that provides a single interface to:

- > Manage accounts and configurations for all your cloud environments
- > Establish infrastructure costs for chargeback or shakedown
- > Set quotas, system leases, and approval workflows
- > Configure a wide range of orchestration elements and extensible actions

FEATURES

- > Intuitive User Interface
- > Environment Auto-Discovery
- > Automated Provisioning
- > Internal & External Workflow
- > Multi-tenant
- > Role-Based Quotas
- > Manages Both Brownfield and Greenfield Resources

USE YOUR EXISTING AUTOMATION AND ORCHESTRATION TECHNOLOGY

KEY BENEFITS

- > Speeds IT Deployments
- > Simple, Intuitive Installation and Configuration
- > Line of Business Cost Transparency
- > Greater Workload Flexibility
- > Enables End-User Self-Service
- > Drive More Value From Existing IT Investments
- > Facilitates DevOps

DIRECTLY INTEGRATE WITH DOZENS OF COMPLEMENTARY TECHNOLOGIES

Anything with an API
